

# Shape Analysis of Critical Manifold $\mathcal{C}^*$

**(a) Semi-Axes of  $\mathcal{C}^*$**   
(longer = harder to detect)

**(b) Eccentricity Measures**  
(0 = sphere, 1 = maximally deformed)

**(c) Weight  $\rightarrow$  Axis Mapping**  
( $a_k = \sqrt{\alpha/w_k}$ ,  $\alpha = 0.3$ )
