

Tech Nation Visa — Global Talent (Exceptional Promise)

Criteria: Evidence Index

Applicant: Odeyemi Olusegun Israel

AMTTP Evidence Pack V2 — Assessor Map

1. How to Read This Pack

This V2 pack is rebuilt around evidential logic, not code narration. Each exhibit states the criterion, the precise claim proved, the independent proof source, and the verification anchor. The technical system is used only where it proves leadership, contribution, impact, or independent uptake.

Criterion	Document	Primary proof	Anchor
MC	MC-1 Live Product	Public deployment + traffic + demo + pilot cross-reference	amttp.com, Cloudflare, YouTube, sealed pilot
MC	MC-2 Authorship	Sustained public engineering record	GitHub commits, repo tree, Colab timestamps
MC	MC-3 On-chain Enforcement	Deployed enforcement contracts incl. ZK + Kleros	Sepolia Etherscan + tests
OC3	OC3-1 AI Risk Engine	ML/graph/rules compliance engine	benchmarks + services
OC3	OC3-2 Product Interfaces	War Room + Flutter + RBAC + explainability	screenshots + RBAC matrix
OC3	OC3-3 SDK & Pilot	External integration route + signed/sealed pilot	Schedule A + signatures/seal
OC3	OC3-4 Security	Audit, fuzzing, gas and reliability proof	Slither/Echidna/Hardhat
OC4	OC4-1 Research Results	Reproducible BSDT cross-domain results	scripts + metrics
OC4	OC4-2 Publications	DOI-backed public dissemination	TechRxiv/Zenodo
OC4	OC4-3 Academic Adoption	Independent postgraduate teaching uptake	CPE 604 + letter

2. Feature Coverage

Feature	Evidence
Pre-settlement AML; approve/review/escrow/block	MC-1, MC-3, OC3-1
Hybrid ML + graph + rules	OC3-1
ZK compliance proofs	MC-3
UUPS on-chain enforcement	MC-3
LayerZero cross-chain support	OC3-3
Kleros-style disputes	MC-3 + OC3-4
Flutter + Next.js War Room + RBAC + XAI	OC3-2
Sanctions/KYC/PEP/georisk/monitoring	OC3-1
SDKs, secured deployment, auditability	OC3-3, OC3-4
